

The Institution of Engineers in Scotland

Considering a career in Electronics/Biomedical Engineering?

Find out about a cancer identifying pill from the Glasgow University professor who invented it.
Hear about careers in professional engineering

St Paul's High School Glasgow –Tuesday 10th Sept 11.00 am.

Professor Sandy Cochran will talk about his career in engineering from graduating in Electronics at the University of Strathclyde to becoming Professor of Ultrasound Materials and Systems at the University of Glasgow.

He will also describe how his world leading invention, the Sonopill, works to find and identify cancerous tumours within the human body.

Hannah Gibson is in the fourth year of her Master of Engineering degree in Biomedical Engineering and will also explain what that entails and the resulting opportunities for young women to follow highly rewarding careers alongside young men in professional engineering.

For important information about careers in professional engineering see www.profeng.org the “*one stop website*” for student and teacher guidance.
