present a prestigious public lecture:

A Career in Professional Engineering
... a lecture to inspire young people
by
Frazer Stuart Mackay

2.30 pm, Monday, 16 September 2013

Venue: The Royal Society of Edinburgh, 22-26 George Street, Edinburgh, EH2 2PQ

Frazer Mackay will discuss Foster Wheeler Energy Limited and the challenges they face in designing and constructing major projects in the very high tech and challenging worlds of the upstream oil & gas, petrochemicals, refining and pharmaceutical sectors. This will be a great opportunity to hear about the career of a professional engineer and sample some of the variety that a career in engineering can bring.

Frazer Mackay, BSc CEng FIMechE

Frazer graduated with a First Class Honours Degree in Mechanical Engineering in 1989. He is a Fellow of the Institution of Mechanical Engineers and a Chartered Engineer.

Frazer is Managing Director of Foster Wheeler's Upstream business in Europe, Middle East and Africa. In this capacity he leads a number of business units located in Aberdeen, Glasgow, Hull, Woking, Reading and Dubai, providing specialist professional engineering services to offshore and onshore assets.

During his career he has been involved in all stages of process plant project execution from feasibility studies through to commissioning for new build and revamp works, both from an engineering and commercial management perspective, working in the pharma, refining, chemicals, petrochemical, upstream, water treatment and power sectors, mainly for blue chip clients, both in the UK and overseas.

Frazer also represents Foster Wheeler as a Non Executive Director on the Board of PM Group, a world class engineering, architecture, project and construction management company based in Ireland.

Registration

This event is free but attendees should register. Registration can be done on an individual basis or by a group. To register please contact IESIS at iesis@btconnect.com or IESIS, The Clydeport Building 16 Robertson Street, Glasgow G2 8DS.
